

$$L_L = 4 \pi N_P^2 U_M \left( \Delta_G + \frac{\sum \delta_i}{3} \right) \frac{1}{L_M} \text{ [nH]}$$

$L_M \Rightarrow$  Maximum length of either \OR both PRI \ SEC

$\Delta_G \Rightarrow$  gap length between windings

$\delta_i \Rightarrow$  thickness of winding each ith PIE

$U_M \Rightarrow$  mean circumference

$\pi * \text{mean diameter}$

## EXAMPLES:

From REF: "Development and Applic of an Inverter Charging .. "

"where  $N_p$  is primary turns (24 turns),  $U_M$  is mean circumference of windings (20 cm),  $\Delta_G$  is gap length between windings (1 cm),  $\delta_i$  is thickness of windings (1 cm), and  $L_M$  is winding length (9 cm).

$$L_L = (6.28)(24)^2 (20) \left[ 1 + (7 \cdot 1)/3 \right] \left[ 1/9 \right] \text{ [nH]}$$

$$= 6.28 \cdot 576 \cdot 20 \left[ 1 + 7/3 \right] \cdot 0.111 \text{ nH} = 2.4E4 \text{ nH} = 24\mu\text{H} \ll \text{== the ref says } 21\mu\text{H}$$

35:1 transformer ==> measured  $\sim\sim 3\mu\text{H}$  using FLUKE

/\_\_ rough measurements: mean dia  $\sim 2.1'' = 5.3\text{cm}$ ; have 4 PIES

$U_M \Rightarrow \sim 16.75\text{cm}$ ;  $\Delta_G = \sim 0.2'' = 0.508\text{cm}$ ;  $\delta = \sim 0.355\text{cm}$ ;  $L_M = \sim 1.7'' = 4.3\text{cm}$

$$L_L = (6.28)(10)^2 (16.75) \left[ 0.508 + (4 \cdot 0.355)/3 \right] \left[ 1/4.3 \right] \text{ [nH]}$$

$$= 6.28 \cdot 576 \cdot 20 \left[ 1 + 7/3 \right] \cdot 0.111 \text{ nH} = 2.4E4 \text{ nH} = 2\mu\text{H} \ll \text{== measure } \sim 3\mu\text{H}$$

270:1 transformer ==> measured  $\sim\sim 4.5\mu\text{H}$  using SENCORE

/\_\_ rough measurements: mean dia  $\sim 2.6'' \Rightarrow \pi 2.6 = 8.2''$ ; have 4 PIES

$U_M \Rightarrow \sim 20.7\text{cm}$ ;  $\Delta_G = \sim 0.25'' = 0.635\text{cm}$ ;  $\delta = \sim 0.508\text{cm}$ ;  $L_M = \sim 1.7'' = 4.3\text{cm}$

$$L_L = (6.28)(10)^2 (20.7) \left[ 0.635 + (4 \cdot 0.508)/3 \right] \left[ 1/4.3 \right] \text{ [nH]}$$

$$= 6.28 \cdot 576 \cdot 20 \left[ 1 + 7/3 \right] \cdot 0.111 \text{ nH} = 2.4E4 \text{ nH} = 5.4\mu\text{H} \ll \text{== measure } \sim 4.5\mu\text{H}$$
